Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 June 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

During a telephone conversation with Michael Skrehot on Aug. 27, 2002, a provisional election was made without traverse to prosecute the invention of Yamaguchi et al, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action.

Claims 7 and 8 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamada et al. (U.S. Pat. No. 5,864,174).

Regarding claim 1, Yamada et al. show, in Fig. 20b, a semiconductor device, comprising:

a contact pad (21);

a conductive bump(33a, 33b, 33c) on said contact pad, said bump comprising a coaxially-aligned stack of bodies having different cross-sectional dimensions, a said bodies at the top of

Art Unit: 2811

said stack having smaller cross-sectional dimension (col.11, lines 61-65).

Regarding claim 2, Yamada et al. show, in Fig. 20b, the uppermost body in the stack has a flat peak plane. Also, see Fig. 21d.

Regarding claim 3, Yamada et al. show, in Fig. 20b, the coaxially-aligned bodies are circular.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamada et al. in view of Kanda et al. (U.S. Pat. No. 6,153,938).

Claims 1-3 have been discussed previously.

Regarding claims 4-6, Yamada et al. show the most aspect of pending claim except that the contact bodies are made of gold.

However, Kanda et al. show, in Fig. 9C, a semiconductor device with a gold bump(2).

It would have been obvious to one of ordinary skill in the art at the time of the invention made to use the gold for a conductive bump in order to obtain a better electrical and mechanical connection since gold provides a better adherence during a gold plating of the bump.
